

FRP Manhole Cover

Manhole covers were traditionally manufactured from concrete, cast iron or ductile iron, but these materials have their own disadvantages like low load carrying efficiency. FRP is considered to be the best alternate material for manhole covers as it has longer life span, light weight & capability to withstand heavy loads.

Available in circular, square & rectangular shapes, FGPL manhole covers find a huge application where the conventional manhole covers get damaged due to high traffic. FGPL manhole covers are available for light, medium, heavy & extra heavy duty load applications.

Key Features

Does not rust and corrode unlike metallic manhole covers

Weather durability

High mechanical strength, tensile strength & impact strength

Life 20+ years

High strength to weight ratio

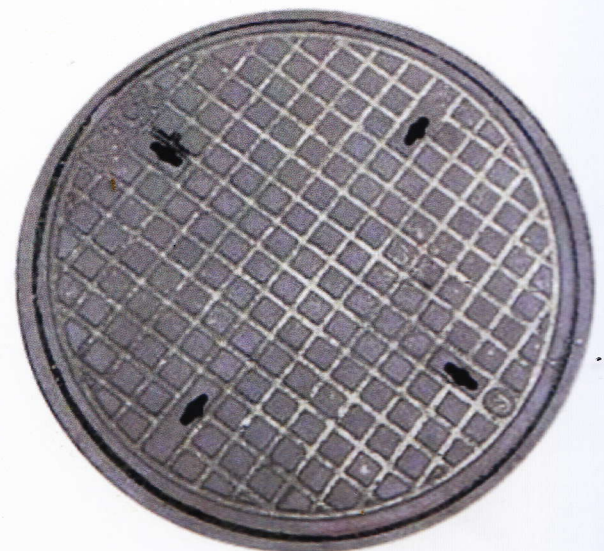

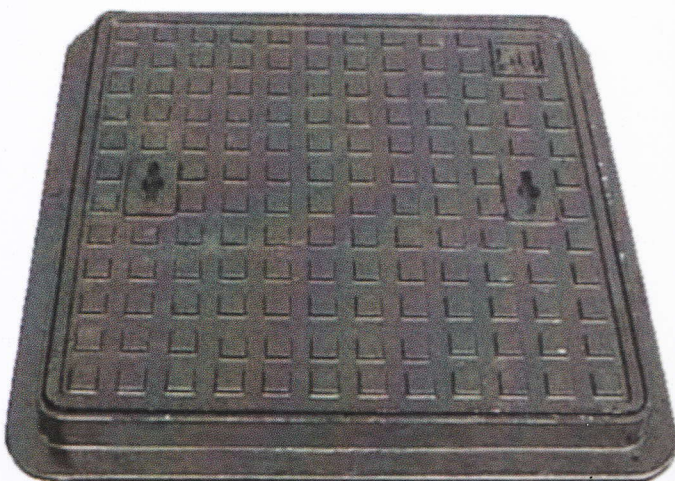

Zero maintenance

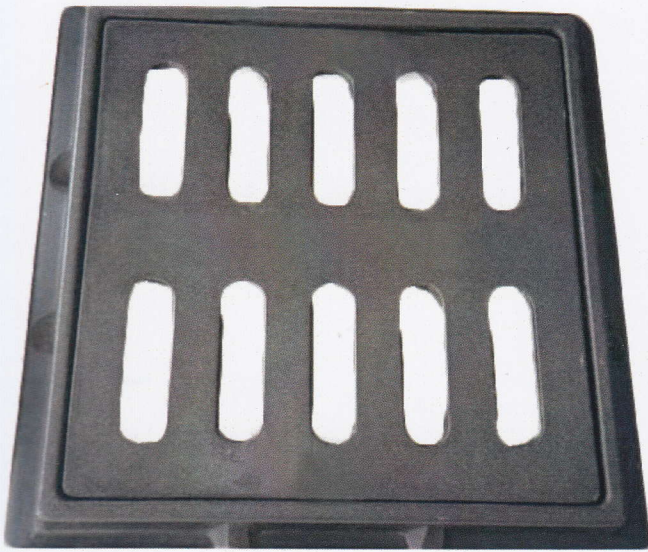

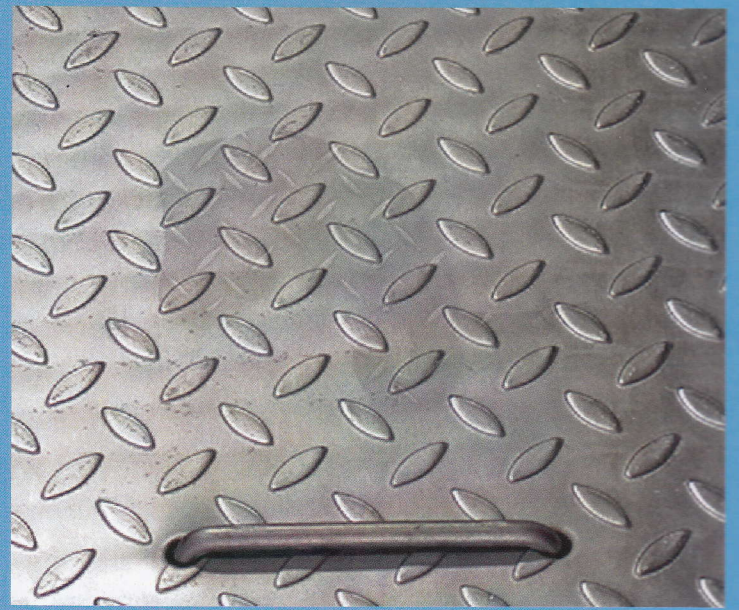

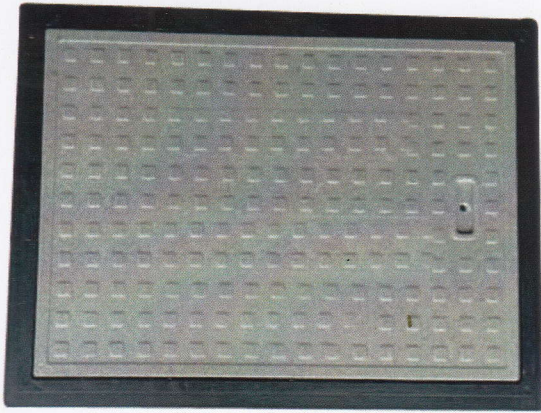

Rust proof & Water proof

Light Weight, ease of installation

No scrap value, hence no theft

Excellent surface finish

Fibro Grats Pvt Ltd

ISO 9001 : 2008 Co.

Plast-O-Fibre Ind.

Since 1985
